

WATER EFFICIENCY PROGRAM

HELPING BUSINESSES SAVE WATER – AND MONEY

Partners in Project Green is working with Region of Peel to provide cost-saving water efficient programs for business.

How does this work?

The first step is to register with Partners in Project Green for a **FREE Water Efficiency Assessment**. We'll look at your current water usage and help you find out which **Water Smart Peel** programs (see options below) are right for your organization.

What are the benefits?

- **FREE Indoor Water Assessment** that identifies water saving opportunities, available incentives, and return on investment
- Referral to Partners in Project Green's network of experts and vendors that can help you realize efficiencies
- Recognition in the GTA sustainability community for water stewardship

Indoor Water Assessment and Incentive Program

Indoor Water Assessments can help you improve the efficiency of your operations. Our advisors will walk through your facility to determine areas of potential water savings. You will be provided with a summary report outlining water saving opportunities, potential monetary incentives and estimated return on investment. Through referral to Partners in Project Green's network of experts, you'll have access to implementation support and vendor discounts.

Water Smart Irrigation Professionals

Water Smart Irrigation Professional (WSIP) have specialized training in irrigation system efficiency, assessment and maintenance services. WSIP are industry leaders committed to sustainable irrigation management. A WSIP contractor will get the best out of your irrigation system and help you maintain beautiful curb appeal, while lowering your water consumption and costs. Visit watersmartpeel.ca/wsip to book your assessment today.

Contact Peel to register today: 905-791-7800 ext. 4409 or watersmartpeel@peelregion.ca
