

ENERGY LEADERS CONSORTIUM WEBINAR

Building Management System by E'nergys

Transition Expert

At E'nergys, we support economic actors in the **private and public sector** to meet the challenges of the transitions related to **sustainable development** and **digital transformation** by being an agile player, alternative to large groups.

Summary

1. Key points
2. Our vision of BMS
3. Live session !

Key points

What are the essentials ?

Key Points

Sensors and actuators

- Multi-brands
- Multi-technical
- Communicatives

Open communication

- Known and proven protocols
- Interoperability
- Web Services

A scalable architecture

- IP network
- Internet of Things
- Data flow

Our vision of BMS

Smart, open and easy to use

Measure the essential

Algorithm

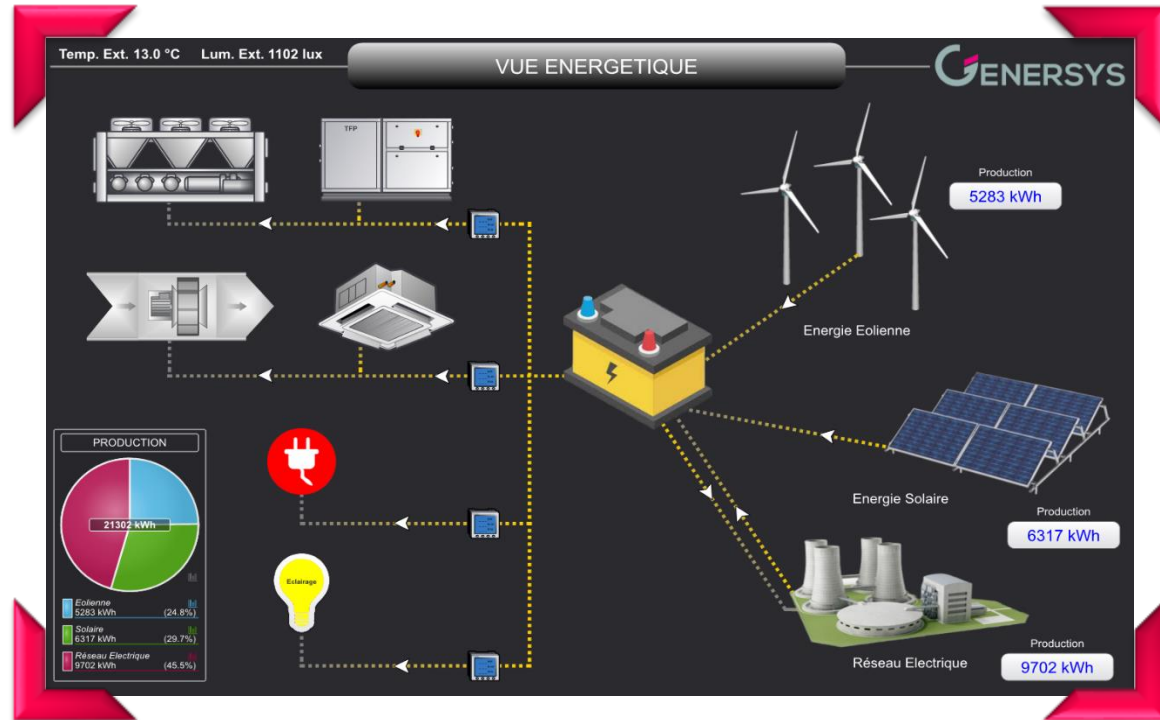

- needs to know what is going on

User

- Tracks indicators

System

- Historizes and indexes
- Digests data and adapts

User has priority

User

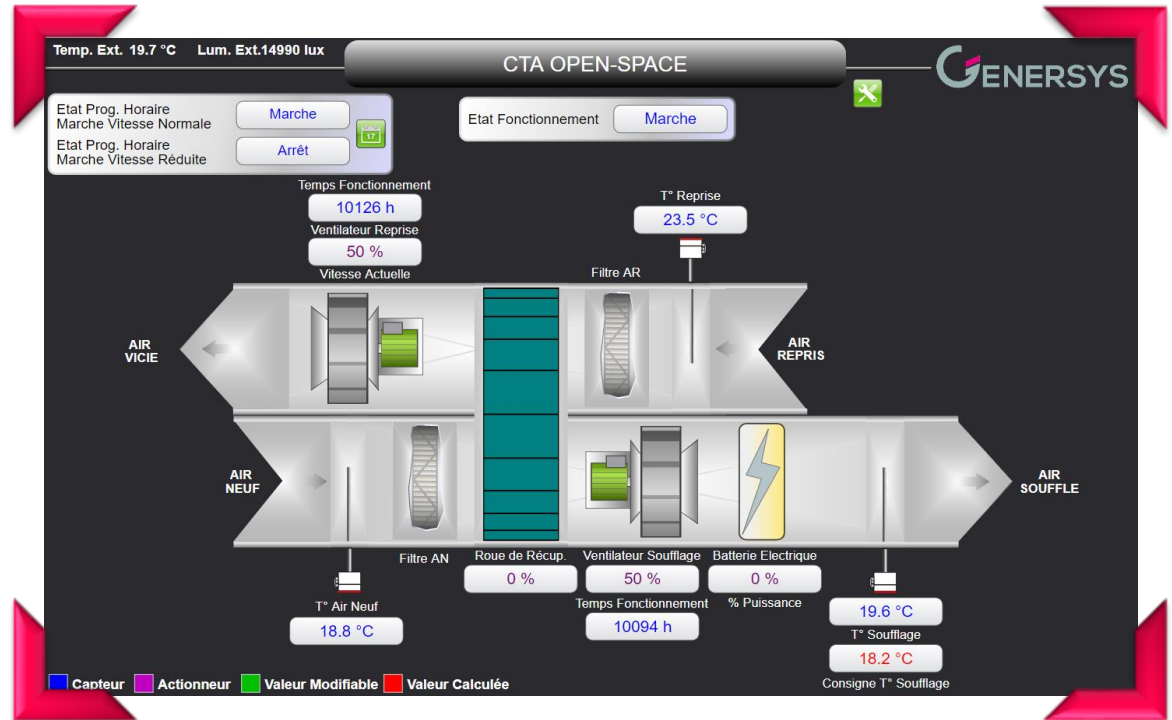

- Has his hands on the system

Controls

- Are just a click away

Management

- Is done in a simple way

Synchronized on the outside

To predict

- Conditions
- Usage

To adapt

- Instructions
- Needs

To anticipate

- Functioning
- Uses

A visual interface

Visualization

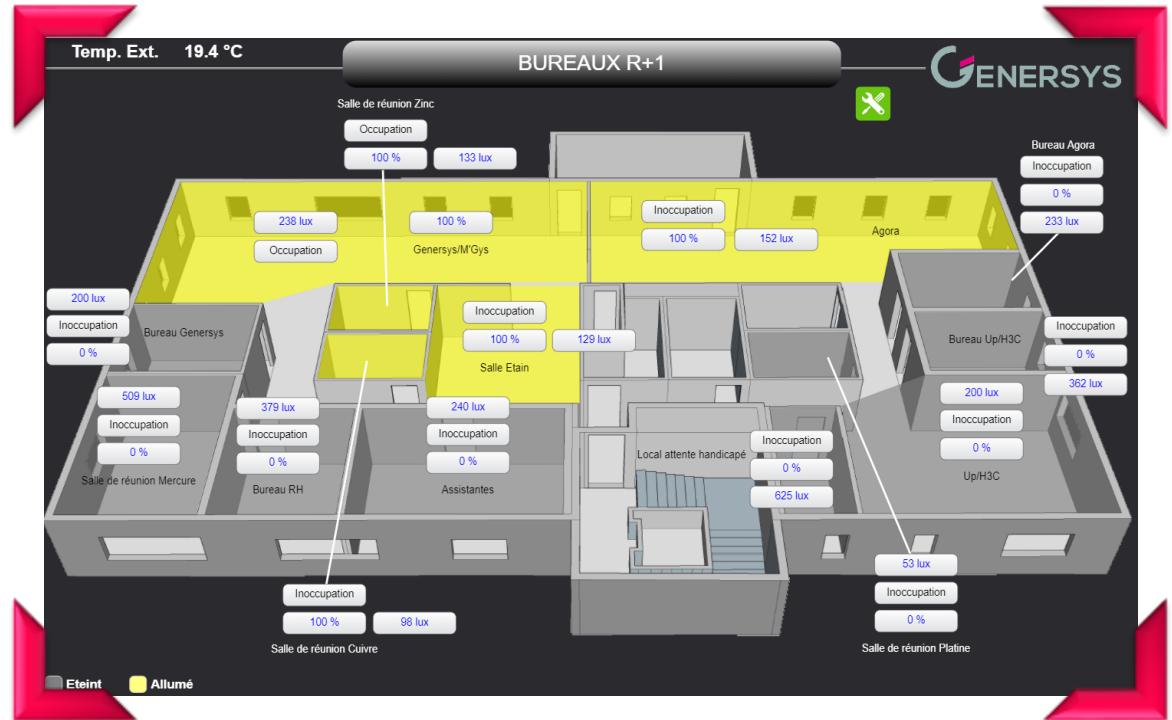

- Synthetic

Spotting

- Graphic

Ergonomics

- Tailor-made

Live session !

Go live

Thank you all for your attention
